

### General Series

General Series Valve Regulated Lead Acid batteries are designed with AGM (Absorbent Glass Mat) technology, high performance plates and electrolyte to gain extra power output for common power backup system applications widely used in the field of UPS, Emergency Lighting System.

### Application

- |                         |                        |
|-------------------------|------------------------|
| Alarm System            | Medical Equipment      |
| Cable Television        | UPS                    |
| Communication Equipment | Power tools            |
| Control Equipment       | Emergency Power System |
| Security System         | Toys                   |

### General Features

- Sealed and maintenance free operation.
- Non-Spillable construction design.
- ABS containers and covers optional.
- Safety valve installation for explosion proof.
- High quality and high reliability.
- Exceptional deep discharge recovery performance.
- Low self discharge characteristic.
- Flexibility design for multiple install positions.

### Construction

- |           |                   |              |                    |
